

C.E. KINGSLEY

PRODUCT ENGINEER | FULL-STACK, BACKEND, FRONTEND & SOFTWARE ENGINEER

Portfolio: ce-kingsley-portfolio.onrender.com | GitHub: github.com/chukstechstack | LinkedIn: linkedin.com/in/chukstechstack
Email: chuks.techstack@gmail.com | Remote

PROFESSIONAL SUMMARY

Product Engineer and Full-Stack Software Developer shipping production-ready systems end-to-end. Independently architected, built, and deployed **Pneuma**, a full-stack real-time community platform. Engineered **Switch**, a high-assurance multi-platform focus and application-blocking execution engine spanning Android (Kotlin) and Windows Desktop (C# .NET / WPF). Combines deep expertise in frontend system design (React, TypeScript, Tailwind) and robust backend architecture (Node.js, C#, Python, PostgreSQL, REST/Sockets). Strong independent ownership, fast adapter of unfamiliar tech stacks, seeking a fully remote software engineering internship.

TECHNICAL SKILLS

- **Languages & Scripting:** JavaScript, TypeScript, Python, C#, Kotlin, SQL, XAML
 - **Frontend & Mobile Engineering:** React, Tailwind CSS, Vite, TanStack Query, Framer Motion, WPF, WinUI, XAML
 - **Backend & Systems:** Node.js, Express, FastAPI, C# .NET, Windows Services, REST APIs, WebSockets (Socket.io), Background Workers
 - **Databases & Caching:** PostgreSQL, Supabase, Prisma, Drizzle, MongoDB, Redis
 - **OS & System Integration:** Android Device Admin / Owner APIs, Windows Firewall (netsh), Process Monitoring, Service-Backed Architecture
 - **Cloud & DevOps Tools:** Render, AWS S3, Git, GitHub Actions, Visual Studio 2022, Android Studio, Postman
 - **Product & Design:** Figma, Framer, Wireframing, UX Prototyping, Component-Driven Design
-

SELECTED PRODUCTION PROJECTS

PNEUMA — Full-Stack Community & Real-Time Platform | *Product Engineer (Independent, Deployed)*

Live App: pneuma-frontend-oijl.onrender.com | **Repository:** github.com/chukstechstack/pneuma-

- Independently designed and engineered a production-grade community platform featuring user authentication, profile management, dynamic content publishing, threaded comments, and real-time private messaging via Socket.io.
- Owned the complete product lifecycle: UI/UX design, frontend architecture, backend services, database schema design, and cloud deployment.
- **Tech Stack:** React, TypeScript, Node.js, Express, PostgreSQL, Supabase, Prisma/Drizzle, Passport.js OAuth, Socket.io, TanStack Query, Redis, Render.

SWITCH — Desktop & Mobile Focus & Execution Engine | *Software / Backend / Frontend Engineer*

Live Landing Page: switch-landing.onrender.com | **Repository:** github.com/chukstechstack/Switch

- Architected a cross-platform productivity enforcement suite designed to lock out distractions, block application processes, and maintain strict background session integrity.
 - **Windows Desktop App (.NET / WPF):** Built a high-assurance C# WPF application backed by a native Windows Service (Switch.Service.Host) for persistent process monitoring, folder locking, and tamper-resistant enforcement that runs even when the UI is closed. Configured automated .msi installation pipelines using WiX Toolset.
 - **Android App (Kotlin):** Developed a production-ready mobile focus application featuring customizable timers, Device Administrator app-blocking policies (TikTok, Instagram, YouTube), strict blocklist enforcement, and quick-mode states.
 - **Tech Stack:** C#, .NET, WPF, Windows Services, WiX Toolset, Kotlin, Android Studio, Device Admin API, React, Tailwind CSS (Landing Page).
-

EDUCATION

University of the People | *B.S. Computer Science* (Scholarship Recipient, Admission Secured)

Status: Admission secured and scholarship awarded; seeking an internship to fund exam fees and complete studies.

CERTIFICATIONS & ADDITIONAL TRAINING

- **The Complete Web Development Bootcamp** — Angela Yu
- **Product Design & UX** — Don Norman framework principles
- **MIT Microeconomics** (Independent coursework)
- **HubSpot Inbound Marketing**
